

MuGate

Full-Project Use Case Diagrams

Capstone-v2 / MuGate · Classic UML Use-Case Notation (PlantUML)

Actors

- Guest — unauthenticated visitor (public reads)
- Student — MU-authenticated user (JWT after portal SSO)
- Admin — Student with Admins table / super-admin university ID
- System (CRON) — node-cron background jobs
- MU Portal — external ums.mu.edu.lb (credential verify + scraping)
- University Website — mu.edu.lb KB crawl / live search
- AI Providers — DeepSeek / Gemini / OpenRouter cascade
- External Event Sites — Eventbrite, AUB, Berytech, Zaka, curated

4. Page 4 — MuChat & Resume
5. Page 5 — Capstone, Internships & Events
6. Page 6 — Admin Control & Background System

*Classic UML use-case notation (PlantUML): stick-figure actors, oval use cases, solid associations, dashed «include»/«extend». Derived from live Capstone-v2 / MuGate code — backend/src/app.ts mounts, modules under backend/src/modules/**, frontend App.jsx, mobile navigation, and sync.cron.*
