

MuGate

Full-Project Relational Schema

Capstone-v2 / MuGate · ER / Database Schema View · PostgreSQL (Supabase)

Domains / table groups (22 tables)

- **Auth / Users**
Users, PortalCredentials, Sessions, Admins
- **Academic**
Courses, CourseSections, AcademicHistory, Schedules, ScheduleSections, UserRoadmap
- **MuChat**
ChatSessions, ChatMessages, ChatAnalytics
- **Knowledge / Admin**
KnowledgePages, KnowledgeChunks, ScraperRuns, ScrapeQueue
- **Capstone**
CapstonePartners, CapstoneIdeas
- **Internships**
Companies, InternshipReviews
- **Events**
Events

Document pages

1. Page 1 — Full Schema Relationship Overview
2. Page 2 — Auth / Users
3. Page 3 — Academic
4. Page 4 — MuChat
5. Page 5 — Knowledge Base / Admin Scraper
6. Page 6 — Capstone, Internships & Events

Key FK hubs

Users → PortalCredentials, Sessions,
AcademicHistory, Schedules, ChatSessions
Courses → CourseSections → ScheduleSections
ChatSessions → ChatMessages
KnowledgePages → KnowledgeChunks
Companies → InternshipReviews

Out of relational schema

- Chroma / local vector store (RAG embeddings)
- In-memory embedding cache
- Resume data (no DB tables)
- External MU Portal / university websites

*Derived from live Capstone-v2 / MuGate PostgreSQL schema: supabase/migrations/20260714120000_mugate_schema.sql (plus unique-constraint migration).
Legacy SQL Server DDL under backend/src/core/database/migrations/ is the historical source; Supabase migration is the product DB source of truth.*

Relationships shown only where declared as FOREIGN KEY (or noted as soft / no FK).
