

# MuGate

## Full-Project Use Case Diagrams

Capstone-v2 / MuGate · UML Use Case View

---

### Actors

- Guest — unauthenticated visitor (public reads)
- Student — MU-authenticated user (JWT after portal SSO)
- Admin — Student with Admins table / super-admin university ID
- System (CRON) — node-cron background jobs
- MU Portal — external ums.mu.edu.lb (credential verify + scraping)
- University Website — external site for KB crawl / event scrape
- AI Providers — DeepSeek / Gemini / OpenRouter cascade

### Document pages

1. Page 1 — Actor & Package Overview
2. Page 2 — Public Browse & Auth
3. Page 3 — Academic
4. Page 4 — MuChat & Resume
5. Page 5 — Capstone, Internships & Events
6. Page 6 — Admin Control & Background System

*Derived from live Capstone-v2 / MuGate code: backend route mounts (app.ts), modules under backend/src/modules/\*\*, frontend App.jsx, mobile navigation, and sync.cron.*
